Ok, buckle your bullet belt, grab a sixer and a bottle of Jack. This ain't no intellectual black metal ride…this is the French black thrash Armageddon courtesy of LeathergoatSSkull (aka Lord Genocide of Vociferian) and NunSSlutgoat. And before your elitist "gimmick alert" goes off for female vocals, I didn't even realize until I read the bio these were sung by someone with a vagina. That's the extent of the ugliness going on here. Dual vokills from the male and the female terrorists. A lot of you are probably not going to like this shit. It's fucking fast and at times a little off-kilter, the lyrics are straight forward odes to the split hooves, but if you still like to drag out your Von demo or from time to time slam a shot and shove in The Oath of Black Blood, then this is your deal. I'm listening to the outro to "Pale And Impaled" as I write and fuck yea…this is why I loved Black Metal to begin with. Some other tracks that nail my sack to the wall include: the above mentioned Pale And Impaled, Cheap Whore Mollestation, Butchered Christ with it's old school, plodding "let's go out in the woods and get fucked up" intro, and the majestic Leper Angels Lair Abomination. Is Satan Jugend progressive BM leading us into the next millennium? Hell no. Are the Goats rewriting the book on Norse extremism? Again…hell no. Does it fucking put the neck snap in necro? Does it make you grab the volume and turn to the right? Fuck yes. If you're looking for the "next big thing"….keep going. If you want a lethal dose of satanic black thrash…pick it up. Definitely not for everyone, but I'm digging it. Jeff Rating: 8
